weak. irregular. a wider warm water, ^{water}
gray. skin one.

When cannot suck. Give it milk through
A bone. for other way. To learn to drink
to. & you the breast. & squat it up the more

a good way the more with a spoon. at this way
Bed ^{most} ~~most~~ ^{all} of cake for mouth need not

Bed a basket as good as any or with the
mother better still. Move them often. use
short pauses movements regularly

Short calls. danger to those sit. & sleep
soon die with them attached and a

idea: of body also attend to all
the life functions.

These ch. often come after an illness
to the smooth ch. pregnancy, a chh
young mother's
when ch. come
then meth. ^{obs why} man with heat, or within
of mother not healthy don't let her
nurse, get a wet nurse.

Sand baths & put the bed in a cool place with man
when a healthy ^{water} walk at first in warm
& get the care ^{must move the mother} ^{any} 2 get any ch.
man of strong & comes soon. If walk
not for 24-36. shall give a help?

volunter animal. helps to enough
man ^{a sugar} if it does not come
with that. 31 in 2-3 oz. & take
a little. A mother should always
nurse own kind. her milk is

not sin although it is prompt but flag fluid
more suitable for the young
& the fat of a fat mare ^{not} about a
child. says Dr. are not always
the best, they are small & full
ones. Small are better
attend to the nipple during the beginning and

with Boar's or laugetutin
it can perhaps a good deal of trouble
after birth of ch. of the mother
by the 3rd or 4th day ^{Sight in part myself} it will not much
a่อยาด & prunely
her child. Then an eases when
the milk is so poor that it can-
not nourish the ch. in there
are a wet nurse.

Health the first symptom is loss with
but nurse, best between $20 - 50$ ^{over this not}
^{good not under not good} ~~that~~ ~~has~~ has had one child at least
breast, menstrual time, a full round of
the skin, vein distinct, & feel the bones of
the heart, when poor, it must milk
spit out ^{from my fingers} as much as
Barts, ~~the~~ ^{that} milk themselves may not be contrahed
to times. Month. Breast nipples are in
at great depernies when the milk thick & not
an draw in easily, or the very hard, This
makes no difference to the strong ch.
but a weak one must a care, I have
met, a easy draw breast for a weak ch.
whilst I pull at me in both hands, so the
nipples must be good pressed well
under 3 months is not suitable with
one breast it is a surper error that not
enough a breast, Should not be over 2 months
^{or give new born child}
let the wet nurse use a cloth to which she
has been accustomed the, he will
not be disturbed

The age of the am as am is important
a new born ch. with a 3 month am, seen of
dyspepsia, or nearly always child correspond
the age child. age of ch. above am not good

~~Catarrh of lungs & bowels~~
When the 1st in the period gets over
say no malle when that. Child comes
seems healthy & but not so is. The
milk a little changed the cream is
burned. When in the 2nd time gets be-
tween the 1st & 2nd Child gets colic appearance
2nd period. then app enter longer. soon
this or 4th the colic not longer seen
with the cereal of the period but con-
tinues for 4-5 days. get pale &
feeble. the 1st 6-7 milk old
& the 2nd period over the 3rd the
milk. but of 2-3 month old &
stop the 1st & when the 2nd period
comes. Another. Galactophores
in a quantity of the milk stand back
in the breast. When it has mixed
with it then a newborn one appli-
cantly. Then it does not milk
as the other does a strong cells
place and get a strong ch & draw
the breast. & Nellid. 7/ A.D. 5

11 Lymph ulceration. lower part of body thighs
and in the chest, covered with scabs. a layer of skin over the
mil. skin appear & ulcer in Lupus. L. skin
when molecula of skin but
abs. cover with scabs. Superf. of L. skin & more
extended. Syph. more local. They proceed per
growing in the centers of skin. Big 10 years
old. skin before such appear brown in a skin
patient. & Syph. cut. scab grows. formation of
2-3 years. An end with 2-3 syph. manner com
of the child however. syph. they are commonly purple
L. canit. are death 10-12 days before it heals. skin
of 10-12' allow the scabs to eat. in Lupus after 2-3 L.
& then white pus follows

Lupus

Now case Hebra diagnosed. Syph. and Nervous
Syphilitis !!

(2) Eczema. Office nitrum, a balsam acting in a grown up person when such an Eczema exists one can always say that some extension of course exists. either extreme heat, or simple starch or wet compresses are sufficient.

(3) Nummum of Stick

or 97

4 Ring. Scabulous infiltration of skin, i.e. Lupus
bulbous skin under an, with
an ulcer. In that only flat acal. why
not large, light colored, light red colored
is on periphery with crusts covering.
Is it by a Lupus? under the crust, flows
yellowish.

This

In childhood Lupus is identical with scrofula

12/1/14

1st on my begin, 1st on an acne.
2nd on an Eczema which however runs
panes into the hair follicles
Paroxysm forms from knobs, or, at first
in wings of Meopis runs in the summer
when KI is given against it, it becomes
worse especially if the skin acne comes
out
when one soaks in Prorias office it is apt to
cause dark pigmented scars.

Wunderlich

a grown up medical man gets Pingo when
they have had it as children. It is always the
a winter accompanied by an infection
13/1/75 (Meth)

Pinnaris vulgaris (Linn)

Other disease as Pingo &
Sethys, affects the Strickfläche of the limb
as well as the affection when it is met with
after the removal of the Schuppen you do not get
the bloody band but an undulated base
of the meat former shows this bloody base
Also this case in the abdomen, when a
rat is clamped to Pinnaris, in men trachea
clamulus is often to be seen a Pox, same
with a Rat, disposed to urticaria when the
skin is stimulated. Also on the face, of
the case but as a rule no slight infiltration
also in the Kopffront, but usually after long
continuance of the disease, at first a slight dry
aphthous sore, Syphilis is not the same
fairly permanent & hard to find but more
to do with it as seen in hundred disease
as scabies, want seen as
part of the hand is always sharply bounded to
the hand, say runs over to the forefinger
& surrounds

Echinus Capitis, same, when dry on the
head in a small spot of 2 or 3 hours it
eats the a weak man

of glandular can may a constituent
cause cordal. Cases of degeneration of
animal in child often grow up in girls
with cleavage of ovaries, or in audience in
individuals & scrofula.

Local, & when give 7c. & out with Leber
man. It is a mottled, better than other oil
of Peru. & Fr. carb. la. onto with
Leberbutter to make the Rothen
while you sit to dab 3c. & do not cut
the hair for Eczema.

14/1/74

Syphilitic Sapples. when this one, has been rolled
up the hill it apples down again (Hebra).

15/1/74

Case of Rupia simplex. (man 35)
Crusts on the nose under side right thigh
lower part and on the posterior part
of left leg, flat internal, varying in
size from a bubblegum to half as large
again as a thaler, surrounded with
an eddied margin in which a few bladd.
could be seen. On removal of the crust
only a flat bare redded area, no
loss of substance, in time Rupia without
& except when the crust are removed ulcer-
ation is present.

An & extraordinary rare case (Hebra). It came
again much better but the fine appearance was through
maliment.

(man)

Syphilis upper lip only & no more. Great inflam-
mation & bandage & commencement of Kaszoo
in the angles between nose & each lip.
& strong rub with S. oint. so it will not run
always have 2 draw out the hairs regularly
Make the skin soft first & it does not pain
much at most be sharpie in with pinion
& a ^{small} ~~large~~ ^{light} ~~heavy~~ ^{thin} ~~thick~~ ^{sharp} ~~blunt~~ 3 and put on this
soaply all day & lap. bind. up in a cloth
18th better

Palmar Pustules (man. 35)

was in Hospital 2 year

Eczema. 7 days. Syphilis. must be during
from it. 11. on the hand the sharp border is
seen in ^{as here} eczema or if it has it comes
from injury, or the occupation.

Ulceria. If one can occup. the with a strong
pissum on the hand form as the hand
specimens.

Syphilis alone without other points. It comes
from either a. Mac. or papulosis. May come
from eight vehicles in a circular form which finally
ulcerates. With the in in the mouth, but if
specimen is, and as there can open come off
10-20, 40, 50, 60, 70, 80, 90, 100, 110, 120, 130, 140, 150, 160, 170, 180, 190, 200, 210, 220, 230, 240, 250, 260, 270, 280, 290, 300, 310, 320, 330, 340, 350, 360, 370, 380, 390, 400, 410, 420, 430, is applied

Superficial navi treated by removing the reddened portion
and let cut flat and apply the chil. ac. in a chairie
Copiba ^{oak} after the use of copi. sum for 4 days

Rheumatism:

times flexion when mal hemato-seare also
in swollen hemato-seare. open about the small
joints ^{hem} R. neph. R. Chilera, hymen and
in open short. in early particular.

R. by philox ica, when forced by long jour but
trifid mann pigmented

Hypothymia manu, is always distinguished
by a scale long in the centre of the spot + it
expands in the periphery. Pyph. in skin can
int in var ways

When the induction of a head chancre
is removed with the elastric ligature
a smooth granulation is left & no inden-
tation follows.

Eczema of the Scalp

To be distinguished from

Seborrœa comes in about small ova in
sum up as during mental distress. & it soon
limits the glands are not enlarged
Farms at wrists, but the hair dry brittle & pull
out easily & the crust an yellow scurped

Pilares more scales than bages & always
sharply defined by the hair.

Eczema always soonest find the hairy hair stand pille-
Syphilis when move the bogum set
upon beneath

It is an Eczema bogum swelling offend
Treatment. may bogum. Oil rubbed in
the point of oil a sponge & rub it in the head
take a flannel & put on the head for the
repeat this ~~will~~ every morning, brush out
the scales with a hair brush.

(Helra)

dark sandy, always an ^{come} congeum of non-
a soft chancery or nearly ulc'ry, but the flat-
plaques, always from Syphilis, chancery
and a spilt ^{come} sandy eruption (Tulpe)

The two cases of universal vegetations
(de Prager & Hanack both fatal
one not- skin & mouth - syph. the other
not skin & sandy: non syph'is

18th

Helra says that there is no better black
pigment for the hair than a burnt
cull. Run the comb thro' the hair and
then rub on the the cull well

He also doubts entirely the assertion
that hair grows while in a single
night suffuses that it will take
as much to turn a man's & 6 months
a mirror

Sy. Ang. mita

first, macula, & perhaps all
other ulcerative. Bone app in the
first place, rare. May remain latent
& come out, at proper, as ulcer on
skin or sepp. or with them app.
of bone. This child 6 years an app
such as is now found at
first, a great variety - a septic
syphilitis. Rare syph. normal, tho' by
a loss of tub. - and when, in the perh.
a sharp border, above, the border
outward, there alone the sy. in
Tupis, the latter in the nose. The
surrounding, never normal. In it comes
a far embankt. A embankment lies
also in the other nasoph. Tupis
would not with so deeply without
affecting the other neighboring parts.
A Tupi ulcer also on the hand. Mouth
& mouth: none in syphilitis. The species
Tupis at this age, rare or never? comes
over the hands. Syph. is an such case
very original. When that has
the character of

after some time, often menses then
appear usually come out late
at Puberty or before.

Therapie, such as care with gutrapaper
on, & it is hard to limit it when the
swarm ^{dis} is dealt - red; even in 8 days
be whole up up, otherwise, may be cle-
tized by this gumma syphiliti.

Rest with Cath causticum. To eat well in
the surroundings. In all methods
of syphilis the best is innunction. With
a helminth & also when in skin same
small child give innunction (6⁷). 12 gr pris
olie, one curva, & half. Curva mixed
with in skin. one day. leg. next the thing
so on tho. the limb & body.

Eczema variabile. arms from washing
long. duration. 3 v.

Eczema subacute

Man 65 years age.

Find ulcer in middle of the thigh
a stiff green fluid excreted. Other parts
dry & shrivelled, broken - E. subacute. Also small
pustules - E. papul. On sternum the
skin red & excreted & swollen. In face
black crusts, in forehead when more
advanced, - E. impetiginosum. - In
three fingers, one place, dark, not the
thumb - the excreted is slow & tardy also
seen in old people, while on sternum it is more
placid, skin in old people, the affect then
differs, the skin is not so dark.

Herpetic. Found all as E. subacute, after the usual
foments, nothing remedies - as S. variolosa
with. Zebraw. Un. or Carb acid. 3 i. offc 3 v.
& eve. On face, get away the crusts & apply
after this has moderated wash with very sharp

Therapies

Internal or External; of former in
cases ^{an} in which, treated with extracts of inner organ
of flower with a Magne calant & can be immediately
treated. Intermittent also accompanied by fever
& treatment or change of climate. It goes
of flower in concert with diseases of several
organs of human & in general in seasons in
which in the families the predisposition
must be treated internally. K. I. & Arsenic
both off. is not as good as Arsenic. It don't
that then an farm ⁱⁿ which it is, habitually
there are very obstinate cases & a large flower
size. K. I. in them is better arsenic in cl. 6 gr. &
in gum size 12. - 2 & 1/2 of 2 or less solution

External Give the bath & then wash
all present. In gen. Ec. is an infla-
of the skin & it is as other inflammations
antisept is best. If one part suppr. & don't
inflict will diminish it doing care. The skin
very vulnerable in these cases scabs
comes readily. of a local - fair - enough of
cold compress or a strong. as alum. & Al-
um compress for inst. as a number of with-
bandage it becomes more take

A dis. or bath water. In form of bath
etc, in certain form Capricorn. Dript. if it
is nicely spread. or when skin & soft. is
Principally obtained the skin thick &
firm with either a Soda bath. or Sulphur
3 lbs. in 3 lbs. of water a bath of 28° or of Sulphur
from a & always when Soda 1-2 lbs. in
a bath.

A rule Ec in general not into bath ch. Take
a skin care a cloth with it on head. from one
week, & never wash it off then away with
it in 2 & hours. when you see it's not
another day. of acute find skin smooth
& moist we anointing. astringents as
Alum. or Borm. or a 37

Molluscum Sebacium

Woman aged 23. Many tubercles over the skin
from a pea to a hazel nut. pale color as the
sun pale. dark col. pale,
some situated on the skin yet, & others in
them healthy & smooth but one or two
comedones seen in them. The swelling
are soft & if press get out.

When the calymmanum collected in the follicles
get torn on the outside - a comedo
Molluscum sebacium if small or get large
Schium sebacium if mixed with much fibrous
tissue.

Syphilis papulosa. a woman 38. married
sever years & ch. dead. Small brown colored
papules covered with a thin exudate
arranged in a half circle from & affecting
the back of the arms. This comes often
in old people as one of the first appearance of
syphilis after sever 2 or 3 years of married
life & after having turned quite healthy and

Acne rosacea base strongly reddened, usually
two indented vessels + no smaller how strong in
pours a yellow colour
comes chiefly from drinking beer since the bill
chiefly drinking + schatzapp. Some who drink
too little + get bad nourishment, often
a poor student, are first as a seborrhea
+ then a redness forms + then an acne
poor women with sexual desire, or stretching
out of the nose but the cheeks also indi-
cates diffuse redness. Chou magau calan
produces it. Disturbance of liver, Pectoral
may cause, small accums with adema
of face + eyelids.

In evening take armen balsam + put 3p. Sapo-
nit + rub it round with it + then take this
salve. Miss. Zina Berg comb in

30th

Eczema actinum or sublim

Indurates + up to the nail reddens, + man
much scratched. skin moist also. The nose
lips swollen. on face, swelling + diffused
in face abounds. When any c. is sharply bounded
in this way it speaks for a weak origin tho'
some scabbed about. on face + neck also uniden-
tify bounded. Different from in diff. spots
can kill alcohol + carbolized. If ven gall
3 grs. glycer 3 fl. + wash 3 times a day +
then take anybun will often make it disappear
or disappear. When skin infiltrated not go
with this melted, but if not strong rub

• with much water. simple methiod will
do as 8 per cent & oil spread on it
left in the above fluid 3 times a day
(Come on Tuesday). Feb 2 much better all now fine pale
only in the buttocks.

Leucina magnatum

On the inner side of thigh when scab
comes then rendered, on the periphery it
is bounded by a hard, raised, comes with it a
yellowish, thin, infiltrated part, by exam
now. Same may comes in fat children. When
wants long time skin gets infiltrated & covered
with scales. Erythema not, when inf, red
where with scab on & even unless
often in children a dipthhi process forms
at these spots. In persons who sit much
their very common in the scab under
the skin. The infiltration & scales over
it. When any parasite found inside in
any external scab discharge, so comes I
believe it is not sharply bounded, or
at first but it becomes cut & find an
Leucina magnatum. There spots from
a favorable nucleus for all these parasites.
These parts spread of vesicles in a grayish
form. Another form: vesicles too numerous
at the one part of skin in circles comes out
in which a part when an scab discharge
out. It goes out from the bottom & an

with some scabbing & it develops then
as a sores half circles when first can
find the Ptz elements when old the skin
infibulated cannot find them

These cures are tremendous & obstinate
relapses come often after the place is even
made clean as some remnants of Ptz ch-
remain. I see a rubber but change often
the only make it worse. Take care that the
angium med is pure
Angium in alcohol for 24 hrs. often dry it
wash & bathe every day

Acne diminutata

very bad case covering the back & face
no good taking such a case into the hospital
though could cure in six week yet a
nurse would be sure to come in peky
a bad case

Feb 2

Care of Prognosis vulgaris over the whole skin diffuse & mushy scattered. Not very old. Prognosis - fairmable.

warm bath & daily rub with 2meersape & sit 3 hours in a warm bath (28°) when come out. It remains - the tan - still on the skin placed again with 2me. Parci & wear flannel face. soon healed. mushy & soft raps all very simple. On head. eruptive & mgs. of a relapse - which is likely as in all hereditary diseases - as in Ichthyosis who is a skin from of this disease. Must wash daily all over & once a week a warm bath take with leipegrist

Care of Lupus a woman

1847 & then

First hear in 1854. & then in 1869 between the time well. Now a relapse. May while & then cicatrice, then the length of time which it has remained & not affected any but the face. Rose first & wings gave give an ectropion from contraction of cicatricial tissue. also the zahnfleisch destroyed by it. These comes on getting rarer

Lupus hypertrophicus

Aug man 22. an acute
decubitus on back. on the right foot, back
& sole the podagra form. diff. growths on
it which with Borken are covered & these
are crowded up with fissures.
Same mix as diffuse Borken. On the foot
sole in the cubiti a nodule & on the periphery
the same Borken. what is this? If the
Borken alone would be an awful affliction but
Borken covered - a growth of the papillae
usual, smooth. Sykken is it not would
not wonder in deep. See below
a Lupus & a Papillary growth - a
Blumenkohl. growth, an hyperthropy of
skin as an Schleimvis but a comes usual
over a large surface. Most think of Lupus
- a Malariose or tumidose. Lupus does not
does developed such. Borken & it is especially
in these respects - Lupus hypertrophicus
comes chiefly in the toes, usually in early
childhood. Next with Rab. canthum or
Galvanic contact. 1/2 year old 3.

Aug 31st on toes for 3 days & then seven
before removing remove the Borken with
oil & poultice. Must protect the second
wings with plaster. If well concealed
will succeed.

Eczema marginatum

4/2/74

4 Acid Carbolic 3*ii*

' alcohol. 3*i*

apply to the spot.

It attacks women sometimes & in both sexes is characterized by its remarkable obstinacy & tendency to relapse though when fully developed it looks & is in all cases precisely like *Hepatomata* & *granuloma* yet the long obstinate course of the one often 8 months & the short & dry of the other form a radical difference between the two.

Ictyosis an enlargement of the papillary bodies & nucleus of the epidermal layers I. simplex see only polygonal spaces in which the nuclei are as inf. thin of ep. thick & of greenish colour then I. suspentina ep. much thicker & of diff. colour, & lastly when papilla are so great that they form projection in the skin called

I. congrastra or warts seen after birth when a child has been neglected

and not varnished the caravans
dries on them & forms large scales it
is a common form of old.

In simple cases the floor surface of the jin
the pens open on fire. These cases
are the most common

Syphilis of the nose. (woman)

The nose may reddened & a slight effu-
sion with no other change seen. In this
case there is a sub. in. a sharply defined
Isula tan. a Lupus a syphilitic
an ulcer who one - two day last painful
& simple. Lupus before it - in one part
such a thick build it is looked at
least for a year & over the surround
would be affected.

Syphilis & a rhina & clivosa a peculiar
effect of the W.M. spine Palate &c. com-
with the sarcoma

can be nothing but Syphilis with such
a sharply defined ulcer & the gaumens
& mouth far altogether.

It is an aegan or congenital. Not a
recent form as the Cancer & Ulcerous

Eczema acutum. face, ears & right ankle
all fours, erythematous. also it is present
does the L. depend on the scabies. In
the face no gangrene, on the foot he has
laid benzoin and on with some plaster
& cauterized the region. Arnica trichloride
use to many cases of Eczema & not only
in the place applied but a wide spread
one. - in face &c. with unimportance
is the etiology for the progress
Twice a day with Unig. against
the scabies & use Unig. Dracyli on the
face & ears against the Eczema

Pityriasis versicolor, differs from Clostridium
in this when you scratch it can be removed
Palpate smoky brown. No itching
comes chiefly in countries when placed a
cowl on worn out the skin, when
it has curled long usually a little pugnacious
beneath. Unig. ant. scab. & flor sulph. Ol
Rhusia 3¹/₂, Crat alba Sapo viddi
very simple 3¹/₂, Nat. Penruan 3¹/₂
Take a piece the size of a walnut for the chest
& another for back & rub in & when in
3 days when the skin is sparing no marks
remaining. the rubbing for six days & then

or two days continue to apply the salve
without rubbing in & on the 9-10
day take a bath

5/13/4

L. rubrum ^{in head}: only in grown up persons when
in the head & neck, can you see 1 or
of us in children & women in this con-
dition you are apt to produce swelling
and suppuration of the cervical glands

of year. darkest. of expect especially
the stomach. sit at table & under
these spots see. Purpura spots
a Purpura. Rheumatica or Pilorum. Rheu-
matica with. Rheum. the red spots on the
at first faintly disappear, by pressure
afterward not. but the old spots
of haematuria seen. often found. All
in cure with this.

Purp. papulosa. on legs spots (back) in
cachexia. scrofula. cards often diffuse spots.
Brothchen. It is a term the which the
spots is named in Brothchen

P. variolosa. in these cases, infusoria
in skin may point haemorrhage blood in
other organs. in Sydney. each in country
they usually go to earth before the eruption comes
out. P. scabulosa is also another
form. P. stern comes in young

individuals. They are often arranged in groups. Not of very much importance & usually won't keep a prime position, occasionally it comes as a chronic affection & differs markedly. in addition

Case of scabies which had been cured & had left the umbilical for 3 weeks returned to day with a brawny, looking on the legs, the skin which is also strongly attended and itches much. The question is whether this is but a recurrence of old or a Pruritis. May be a condition of scabs yet remain & some on the back has the longitudinal arrangement of Pedes

Typhilitis of nose

A young man, nose much swollen & raw at edges of nostril. on the inside the septum is gone & ulcer. present either a Lupus or Typhilitis. which I L. not out on one but in trumpet on bone. In m. Lupus new found such a close union leaving the outside intact. in this one ground shot out the Lupus what from & where. Aug. soon after birth as Mac. Purp & Pal when after birth put 3 mm skin over all of it & in 3 months later 12 - 14 mm then on under the a deep ulcer ulcerated & grown over & closed on nose, lips & in mouth

Process is small in a few days, during
the more, such following, again epithelial
accrep with some disease loss of hair
with a twist. Large. How now it
is accrescend? when find such a disease
in 14-16 year or young under exper-
ienc, not to thick of accrescend.

Ch. syph. in winter, may much be caused
of a healthy web, & when the chil-
dren take the disease usually as by phthisis
pimpling light, when with birth go t.
joined in 20-30 days but menses
& papillae for may continue. Never en-
tire but one case of Pimpling. Light, accom-
panied by a course of miasma, always the best.
When from the birth of ch. 9 days & interval
a favorable prognosis. The cimex
plumbid of not noticed may destroy the
more & next notice till it blow about

Siculosis uterina

Woman in the left breast may observe
bare skin granul. & the border sharp
defined. Also a spot when an abscess is
smashed also, to the left in the breast
under the right clavicle outward a marking
depressed. What is it? There either scrofula with
a Li. lepro. or by phthis. Lupus never in
this way. Tares of ul. in Lup. This bell So. by
S. Kno. condemned also find the cecat. spoli-
& glands in a little speaks more for scrofula.

But also in *L. vulgaris*, since it smells that
Gum purpurea, but this & especially
the one open ulcer speaks for *Syphilis* but
the rest of the symptom & other special signs
for *Scrofula*. Is it with *Lupus* & *cantharid.*

acne. pustulosa vel. rosula

acne of forehead, nose & chin. along dorsal
Mollusk. pustulosa & dry to broken & when
removed get a subul. lvs. along by women
with damaged menstruation. May
be mistaken for *Syphilis*. occurs in men
in clavus, stomach. The crusts. the adm.
of the bases & when they are removed the
subul. lvs. are the diagnostic points

Lupus amythethalodes vel. cog

On face, cheeks, thin white scabs, shriv.
are on nose & cheeks chiefly. Cannot drag
them off but can form the situation
often. There are thin scabbed & surrounded
by normal skin often. They are the result
of *L. erythematodes*. In the scab, are num-
bered light brown spots, in some more
reddish brown. From *L. vulgaris* must
be distinguished. Thus, in each of
these folia small red pustules, which
have red borders. esp. on sides
accumulate about it, when numerous
along undressed follicles. Red

coalesce & form patches who occupy
periph & heat centrally with a thin
bordering. The circles merge & gyre form
as in *H. tenuissimus* & in the middle
either. cecal or brown marks
when the same as other glands have been lost
the skin presents the white vesicular appearance
other part. affects head. & fingers
Hair falls out & hair follicles, undivided
& covered with scales & some cecatia
form. May also ulcerate. In hairy back
from great ticks like *Pernix* or min
ment. covering the lips affect. & with
epidemic covered. Comes out before the 20th
year & most in females who are older & an
why call it lupus & a it come from the hair
follicle & glands why not seborr. when
in children a bad. find the disease
are done but not much scab but obtrus
shed. In *L. vulgaris* have in cutis various
smulks which pass up thru the layers &
are seen as 'flecks' in the surface In *L. eryth*
find that thru the cegina in glands not mixed
with these same growths who come from the glands
The same cells as in *L. vulgaris* same growths
in one man differ in *L. eryth* more loosely about
the sweat & oil glands

Prognosis. It would rather break a lead
of the whole face that *L. eryth* of a single
spot so slight as it. The duration is say

variable, & treatment. Must treat internally

big time 14 days between. Kali can.
& 1/2 o. perles aquales. leaves no black
shorf. & the crust is thin & can use it
very two days. All means for a about
a big Hg. & Jod glycine. The latter par-
tial especially used after the S. mordet
No other burns in this paper are all black
not is the more ever destroyed. This can
& remarkable for the fact that he uses
but alkali laid on his in the skin.

Eczema rubrum (see my place. book)

Better this morning. erythema gone
now ready for tar. but as do not know
whether it will be well borne one sb only
put over a small surface with oil. ead
when it burns too much just apply a little any
2 better in with patches to are ainted with 1
1/2 ^{12/2/74}
13 Hartric tar well on the neck. not so well on the legs

Lichen and rubrum

Man aged 34. on thigh same affect as cutis
americana of his head. At first stand single
& after a few days. been covered with scabs
in this disease from Prohans which even
when pink. the scabs oft spread peripherally
in this the disease find other Knolchen may be
the head in his neck & the middle of thighs
saying find on the periphery the Knolchen. May
times appear on the skin a small inflam-
ation & if in a high degree cannot more
without great pain. Nails also attack.
Hair falls out. & take out the Knolchen, the hair
falls off & the hair is in the Hoanholz
& sometimes in the glands & gets the charad.
fur occurs gland. The cells of the hair sheath
proliferate greatly, project out & look like a compound
gland. Wind pipe enlarged. On a few
days you called Lichen. old P. named
many so. This now. Let surface a Lichen
rubrum. L. pilosus or with a clavicles
L. articulatus. Urticaria rubra. on the

true Ichthius. Cures in grown up healthy
persons. Often women, ch. rarely. A
single case a woman, an acanthofolatium
in the Grandchamps, men in the March
& other parts & the a patient from
Zurzach. says. In long standing the
fissum get so deep that pharynx is lost
in the face - the old Schermer. Cannot
stare the eyes or open the mouth.
His healable disease & the nice use of
arsenic. must be in larger doses
at begin 3 arseni pills after eating
& then in grad. 8-10-12 pills
at first. see in mouth but gradually
in 4-5 months a cur. Pigment re-
mains behind after the cur with Lich.
also see the same in Psoriasis. Must at
local treat: warm bath 3-4-6 hours
& scrub the skin before wth tar. or
water alone. of rags like rags not tar. no soap
ol. Je. ac. for. & after they drappe them
tar & baths; in my arseni this duration
mg. after increase in the pills to 10-12 a day
or have in stomach; occasional swelling
spur in the joints. H. has seen only one
case where 20 pills (Arsen) a 2 gars. were take
daily by the patient. She got a fever after it
but when she stopped or Arou. passed it could
not ascertain. The true disease which in
their final manipulation may be rendered
to me another as Psoriasis, curable

leeks, radishes & *Polygonis* on his. In this case
of anemia & Bradypus, clothing used
being Cavalier for this man. Anemia in this
appears now after 6 or 7 weeks.

Prognosis

Badly nourished people, with diffuse
not much infiltration. If let man in bath
alone & rub with a brush or washcloth out
of soap alkal & when come out, of bath use the
big Rockdale not the whole & King both soap
to clothes at the time. Shared an big basin
in the face.

Syphilitic infiltration

In skin manub & right shoulder, cecals &
& pub infiltration about them. The cecals
left of the use of the cecals an apt to be big
& strong from which it is excluded in the
in the face.

big. *Glycenum* (37. at night, 134. gly. will
be the evidence of an inguenit

Psonaris (See 28th Jan). Has had a course of
mercurio 2 a day for 8 day, then one a day
& now has the soap on his head & face. Inflammation
of the part about the nose is still more
infiltrated

Syphilis

Ranquin chancre. Ulcer ranquin
aper. Guiseal by follow. in form. of ulcer
at Chancre. partly soft partly hard
After a year one gen. no ulcer cinereus
follow. Soft chancre a pat. in a soft
chancre was created & healed & after
5-6 weeks found a hard syphilis
in the cicat. indurated at the base
then perfectly soft in the course - a
chancre.

Pitryn

Man 40 years. Looking 60. Skin dark
and brown in face, other normal coloured
Many wrinkles in the face, slight ectropha.
The vessels wider. spider vein widened & pigm.
increased. Skin also atrophied. thin. Hair
dark though wrinkled & brown the skin
in wrinkles. Pitryn red for many days
when the skin got off in reddish brown
as on the head. a Pitry. a few from an
R. vermicular. One month. spider appear
with indurated skin. One two min Pitry.

Pitry sub acute bold ulcer, with
E. granular. not so. Found. wider
light red colour & it is with 'chaff'

small & slight uttably sober
detached come again. A diffuse
inflammation in the skin, or blisters
generally over the whole skin, a part
the whole under is often weak &
afflicted. In the Beniga flesche going
for mit com with sharp a notchen
all med. med in 2e. an injur
in this. As for instance - for the huff
gets stronger, same with tonicief

quent consequences. The fourth case
in 15 yea resumma has seen

Herpes toninans L. marginatum

Patch small size on the upper part of left thigh. in the center is a ^{round} scab & blanched from others, selves. In the middle the skin is dry. Blanched ^{stand} in groups are called Herpes when ^{round it} heat in center a village, perhaps, & called H. toninans. Comes in the center but not scabbed. It is an Elym marginatum. It does not develop as in another place. Not yet an E. margin till the efflux has passed the burst of the cutaneum of the scrotum. How come? same cause which can all Pox & blisters, then the Libido & so if it gets clumps & laid in the scrotum. Then Pox element form & apt when the clothes pull out get H. tonin. Comes out cliffe in hairy part & smooth. If both sides pale and surface in center dry & spot in scrot. Herp. macul. Or come as blisters on the hair tons. vesiculosis. They last 2-3 hours. dry & new as formed, & a H. ton. squam. Simulation as Herp. tons. maculosa & they come also in circles in the hairy parts - a head, then no blisters but scabbed. skin when Pox grows breaks out. It comes seldom in head but if break to the face comes out as Herp. vesiculosis. The maculosa form has a great resemblance to a macul. syphilis. Also when minor in H. ton. mac. come in center blisters & also form in center white syph. out. scabbed in the skin & may be pigmented if any reader may see a very limited one.

Therapie. on the Pdy. is in the 2nd. part
1 off with sap. vireo. & a Caudal sauer
sp. sap. alkal. in a flannel. & one an
ung. simplex. Of widely extended give
a bath & one the Sap. on. & an ung
cerbolic. at a 3 t.

On the genitalia a num. of bls.
& 2. my comes out on these spots so by
dark & certainly nervous. After a thin
mouth healing a great part return in
24 hours. Cause, in in Pdy. nature in the
other orangen with skin they get in the
pen test. & when the gender even in
few number remain. suffice for a male
somewhat else also. Bacteria & virus. Men
comes. There again for the. an overld
cells from themselves

Herpes tonsurans maculosa unicoloris

My Anti scabies. & his patient forented
the appear of me suffering with a macul.
syphilid. inf in some spots under the
maculosa than others even in the centre
covered with scales. It was indeed suffered
all over the trunk. Are the very few
3x or 4x days & then put take a bath off
me. Ol. Bursa.

Tetromas

In palm oil village, hand, shoulder, etc.
out this anaplasia of spider. = Tetromas
that the poison arises are more in the
teeth. Looks like a Pro. speck. but in
the periphery always the gyro fixed. Also
the teeth in the latter are attacked
Painful at his work. Hard to work
be worn of caurichone. Food also in
E. of hands. when I. rubrum. often gibbons
with them.

Ceyamus papulorum + mycteria

The former first all over the body, or one
a spot sharply bounded on the thigh
"fold and skin. It is more a local
disease here. I can only compare with
my nature. Smaller first and painful
for 24 days mean or of quicker, with
Rati. cases. + agar to the cayenne or
Collodion. all soft, as 3h. Ceson
sublin 3; mixed, sapply warm
no pain. + the spider is rare in
thaddeus. The feeling of burning is
much preferable to the patients to
the itching. the former is cured by
the Rati cicutae. Lapis solutio
not good for this. E. until but Rati, sd.
also good.

Urticaria

2nd time - 1st continue 8 days second
3 days. All over the body except the thigh
when there are Pustules, the skin is always
more than the depth. differ colour in
the periphery. Dark negro can see the
open of the glands. Brandy & spring
the body over sapher amygdalin

Ezema cat. middle aged man. Extended
over the forehead ears, deep rugae
behind the ear & cervical gland swollen
hot. Use Drayle for ears. ^{in comb.} &
separate some of the scabbed & see
what beneath, & found the skin got
moist & with emulsion oil, for the re-
moved of the crusts, use with a sponge
& put flannel in for the night
after this we ran as fast, for I now
another case - above only run problem
character. Use Drayle for ears in Urticaria
Bacis. O. from Aselli for head & for
some days. afterwards as much wash
up & use glass to with alcohol which
in the former case inflammatory
are the run to

Ezema universale

Child 4 year old. is with Drayle
combined. All over the body. no Drayle
on skin by soft & elastic no circulation
& no knotches. Use Urticaria
Linen & apply flannel over it

American part. 5-areu. 15^o Syroven. 125.

but the only part of Bedlam that I know
are a disadvantage in it is that it does not keep
the sound part when laid in plaster
it leaves a good flat scar behind it.

Cocoon garments most useful for all
these chronic incurable skin affections
as Ichty, Psoriasis, wear them in the night
and wash in the morning, then put on
ordinary clothes in the day time.

Fams. & other parasites affect me the pur-
cavolic acid, weaker is not much good.

Egema capitis. local, confined to front part
must distinguish from Scborba

when Eg over whole head generally, a
mult. of local is local cause & as-
mle. Ped. caps. & find the egg in hind
head & neck. In front it may originally

Syphilis. Hebra told that the down-
to Primary & secondary symptoms suffi-
ciently sometimes get the first appearance
in the inner organs as for instance the
Liver, producing a Jaundice of which he has
seen several instances, or in the Kidney
producing an albuminuria. This only
because we see the maculæ of Papulæ, syphilitic
in the skin that we call them the first
symptoms of the disease. Seven Brain
affections or mania may come on with a
papular syphilis. Interesting case of a Russian
colonel who went out of his mind & in four
months after Kali Jod recovered. Cure of the
rat manufacture with Drapery. Had his a
syphilitic four years primary treated by Hebra
who did not know of this. Hebra mentioning advi-
ced Kali under which in ~~the~~ well known will
stand swellings. H. does not believe we have
any means which will reduce them, not such
when external not Col. Liver oil. Has often
seen after Measles or Small pox, occasionally
after Typhoid, & most plentifully after Typhus
and will remain for years

Impetigo contag. H. does not know whether there
is such a disease, is whether it is really contagious
whether the members of a family exposed
to the same condition all get the disease.
The disease & its contagion not proved

not probably a Pity disease.

Fairies own epithet gift given you night
Leucophaea (H)

drupetigo nearly all over the body
& pigmentata over the back from neck to tail
a second thing is the white spots. Pigmenta-
tion & the surrounding rich in pigment
blotches in the white spots black however, but of
all coccineal occur on neck, face, lower
part of bill & pubis. In animals also the
sign is also red. It is in normal condition
when all over equal get the diff. complexion

Spots varying from purple arranged

recovered. Epith. single. Ulcer ^{syphilitic} ~~ulcerates~~, does
so very quickly & has much pus. Pus
in epith. very however, in syph ^{or sharp border}
deep. Epith. hard. Syph. no so
hard & out of flesh comes. diagnosis
give K. I. in 3 months is healthy. If can
K. I. no influence. K. I. is in there can
a specific means. see effect before
4-5 weeks. Also in tongue bare then
swell come & sing after the time go voice
can be infected or not? Secretion very
in a certain. spid pulled off & pus in
blood ⁱⁿ up a tube so into a follicle
is infected. or the an acne, or mollusca
the sec. is saline infecting. when expel
no change. still possibl as cellular
elements also in a case, an needed
without any abs of mucus abd.

Milk, from Aum. a m. syph & K. sucks
will never be infected. If a strange Aum
infected such a lt. such, it will be
infected. either on Br. wait a day
the it infected, or Aum no other
aff in the the milk only. a syph
ch will never inf. it south but it will
a healthy Aum. This milk is d.

Speluncas, syph of Par. bone over from ^{from} ^{from} ^{from} ^{from}
sinus plentifully. Sineut & megas
in & per. none positive. To said
blood, sal., sputum & milk all
will infect.

What is this a new or old. Is by the affec-
ting stony syph. What is the suff for
or Ter. a sort of broad Cindy, a broad
chanc. he get a hard ch. when talk
Koreali syph. & infest. get also a
chanc. That the Chanc. is impedit
is untrue, All the record from our
Koreas who after long time come out
on the ch. not when raged. but by
a will on the child now apt to
be scrofulous. Ter in partit. not
seen in the child. Impfung: not
succeed to infect with a ^{ch} Garrison, or
heally. but (one a few ^{ch} care in favor)
of exception all does. Can we several
times clear on syphilitic? Once have it
all: one, so say Riedel who says I
man inheitable. disease. Must say
that the ^{ter} ^{ter} is not except. the
slaps are as a rule. but the larger
it past ^{midnight} the
the, in well being interval as long
period healing. the exception in the
slaps become less pleasurable. Can
me a second time be infected? have on
believe. but now 40 cases when
syph. and have had, & still forms
syph on a fresh chancre close use
Riedel says when one an syph. ch. not
poor for a ch. another to come

Can be grump. for a hard ch. & grab
softens me, & for this reason often get
several others.

Herpes zosterous ^{not be bud by} zoster (founded in history)
young man. all over the trunk and
so much on legs and a little in face
& also numerous vesication, as well
as pustules, some of which are broad
with scales in center. The vesicle
is like H. zoster or a papula
by whole. Distinguishing the scale
in center of some of the efflores.
Has also an amplague of spots in
mouth, - in cheeks. No behavior that
he has sy. 2-3 years ago. but that this
is the time. gives a hard diagnosis
in general care would not treat this
yet till see what it would turn out
An Aug. Civil. Wash
Proutis. (H. L.)

Woman with child. 7 in 7th month
however, constitute no distinct gang.
Very excoriation on legs & arms. Involves
itself. A. Proutis. depends on
the pregnancy. Child in seabs gather
also.

Lupus erythematodes. Lupus also in 6th fare
descriptions, a white purplish ~~eridum~~ ^{eridum} other
ing to them. Can be a universal disease
& H. first cases in such a zone of
ground, ging. No case of L. say with small
lips. (A) Showed plates of L on the body
head. Leprosus first described under
this name. H. described it formerly
as leprosum eruptivum. His first case
was acute, & healed under simple
salves. Up to 1833 it behaved like an
ordinary leprosum & affording skin
cases which became more general
fewer & died. Now we can say it
is a loco-antig^o affection & may even
even a fatal course affect the whole
body. Some are terribly stricken
in their course. In this case alone not
so diff to diagnose, but may be with L. only
on the body & general without leprosum
but it is rarely at same time of the
course. Itches. L. not wet, no泡
no crust, no itches no pus, an
infected redness without any ulceration
Pruritis also may be confined to
eruptions ⁱⁿ this, as in L. vulgaris at has
no pus. Then the course is different from
Psoriasis when scratch no blood. When Lupus
very flat eruptions are very flat & thin too
on the body as it can affect but small
numbers without any visible Pruritis

but no blood when scratch a the scales on
it not formed of spider but driedебрун
The people spread a crude building in
very marble skin single cases
Have not winter means against it
after a L. has attacked a certain grade
in the people & tend. all cut means
fallen, ^{calm} cease in power some cases
so sensitive that cannot wear bear
simple long glycer. How Hebrew uses
the scapula. & think it the best;

Devotion fitting, no good to use a zone
the for use a twelve days. Sures I
for 100 days continuing
infected cutaneous

Man with thick semi-dried pustules on
the cheeks skin yellow colored. By
an single & stand in the hairy parts
Here an single pustule dead - an bump
not a lot of crust yellow color as L. mepo
tis. contagious. On same hours
and some sort of pustules in face &
no doubt attack in may and now can
here but can not provide. Only now
had it 14 days; Latumale 12 gr.
to 1 lb. spider. & corporeus
A student allowed himself the way
with the matter from other case

Lichen urticat. (see few pages back) quid. 19th
may come in lips & mouth & little & specific
purple. & a yellow scabular on it
you can see somewhat near it. looks from little
a tiny of Lichen & Bot. Iris. How much
more Lychnis Iris. & it is not palm of hand
as well when Lichen urticat ranc, comes
comes you acute. inf night & this
also when come & covers of thin skin
& with ch. calanct. it may & may
go over the whole skin. blue soft streak
& mixed with lymphadnitis & even
may run on to a Pyaemia. No ha a
case whr 2 in you hand they general
U. Iris over the body.

Leucuna of under head nearly always
brought on by lice both in children
& women. Hair matted together
Pul. in salve. or Platenum for
2 days & then a bath.

Leucuna rubra head. child. 4 year
old. enormous head. Bald in large
portion in crown. rest of hair & smaller
& with crust & scabular around also
extended over the chest & a little in front
over the top a L. papulorum as mixed
in scrophulus undundal. Cal. aged 37. Ol.
the occell. 3 vi. 2 day on head & on body
in the rest also

Diagnosis. syphilis. Mouth. now

Pharynx Tonsils scirrhous. Do not know the internal affec. of m m. but in lab. stage past. come ^{to} Mouth on lip inward. plaques. not plentiful a num. an inc. of epith. cells on mouth angles. & wh. arise & involute quite spontane. often with great rapidity. not in any case other dent. & are often from others indurate or sclerotic. & a whit. spot. leave wh. remains. for year & no relapse. all infectious. Some think that these white patches left not the mouth of syph. but true t is. one of the last aff. of syph. to be there after years of suff or other affections. Gets "blister, wh. burst & a white pus. spot disappears. Heals & soon to recur & not care. when ^{or} bad call aptha. in mouth. Can you recognize the single aff. of an old syph. in them. Complains of irritation when takes any spic. food, & may see a white speckly in cheek or tongue of wh. the pale. perhaps. Know nothing ⁽³⁾ a third mode: in his tongue intermixed spot. somewhat deeper than surroundings & when excurrent see the papill. but from them on the spots. others. sharp. circumflex on the periphery. with a small border excavated with pus. as a little ulcer all this may be called Beona mucosum.

they come often with the R of head apart
& they are an accumulation of epitheli on the head
How do they run. Once more are a tiny lesion
no trouble for years may not know
Other increase in circumference & not only on
M. and but on lips & outer hand &
grows in sum of months as also may
towards inward. Then white hard
glistening affect whole lips or border
of tongue & remain unchanged for
years unlesseed & in a hand as
a catalog. They are rare & according to Palau
proven. They are generally held for
Epitheli & from them epitheli may really
come as epitheli may come from Lupus
as it has had such cases when for years
has treated patient for it. A Lupus for
20 & more years with a skin corn is
suddenly to a Lupus gone over a week
after to an epitheli so it is valuable as an very
destructive & good growth

From 1840 to 1865 H. observed a case of Lupus
in this time - red dark, a epitheli. hole out itself
after coming into hospital said epitheli
from a cornus cornis to a epitheli has Lebret
J. Boen has traced all intermed steps.
says they form the extreme boundary in the
epithelial growth. Must be careful as
they take these growths when small from
epithelium when they are un railed. Sigh
& be a case like this when it was proposed
to operate & he cured her in 5 weeks with 100.

For all these know Agno, & H. I internally
as now & as in the past, aquates nothing
here for there, ting in affection.

Here come also on below see Rehkopf
~~Leffman~~. Mr. & Mr. More & Rha. may be not
by the late one afft. but also the very
first. It has been said on the very first
symptom of a few. syphilitis. I am not
aff. of Mr. More. come in with a & chupper
swelling & then the first symptom. Then
I say that it is syphilitis. From him see. 3th
or an month. cure. Many come in small
children. H. know a case. when a mother^{a friend}
was sick. all health. got sy. as a widow
named & other who all syphilitis & wife up
a year ago married & has. Now she. got
taken a brain afft. & die on a sofa &
then died. ~~Madura~~ has cured him perfectly
when a widow & had his syphilitis
The 4th child in to but often sy. as an fits
flu then comes coming in often nine a. m. & by
a state of all treatment go on to distinct
different place & get at. as it is possible to add
& cure Plaq. m. in fold farms with
best. galvanism or to cure there without
the local treatment wh. is in many cases
quite impossible. When you can eat with
Agno & give the H. I.

Woman. Hair. very herabellous.

Is I am acne cachet, or a *Herpes syphilis*
much pell-mell, come since. The
bulb of *poison papules* also a form of
a *syph.* offers the same. In a *cachet*
when remove the crusts out when been
an ulcer *suppurativa*).

Frambouea from *Syphilitis*. Back of
the head, covered with crusts robust
or rounded skin are ulcer with pale
granulations (*condylomata*), sometimes
serpiginous, in to & termin.

Now case

Lepus hyperstrophicus said *Numeri*
marked projection in arm & hand
in the nymph. especially in center a little
irregular like an ordinary wart when
the broken base follows the spot project
above the surface of the skin & an infiltrated
area both hand & wrist sleepy on back
also in elbows & in feet back & sole but
not so much. There also externally the right
ear like Ichthyosis. but it comes in, while skin
occas. however like these in single spot
& along the course of nerves. Often along the
radial or ulnar. There however an area
in gray & where the broken base follow
in the infiltration. Such appear along a
cortical nerve. would be undoubt'dly
Ichthyosis. A *syphilitis*. Some would say
it was a *sy. cognita*. There no ulcer
in removal of crusts. If it is *Leprosi*
it is from early childhood on 2-3. 6 ye

in hand & feet & thick plaques, from
small growths on surface with a
Bacillus covered & then develop, and
it may for 2 years so grow & not
change the form of the efflorescence
The 9 grace unusual in Lupus, but this
effl. is characteristic & as he has
had it on a few years, it is doubtless
it may be a Syphilis congenita
No effl. in the mouth
must treat as a local disease & whether Syph.
& Lupus. just the same. Must remove
the bitter & sharp, & roll it out will not
do. Soak wood or plant & use the seven
days. when removed such spot eat
with caustic. Ble. Cor. carb. Alumum
Ep. var. ^{Camphor} each var. a a part of equal
= Bleuissin solution

Syphosis upper lip much infiltration sharp
bordered, must remove the membrane

between carbol. and oil on the Leucophaea agent.

Lupus vulgaris

Woman 40 years old. has had it on her face
from a friend all over the nose. & cheeks, skin
bluish red. projects a little above nose &
left cheek, on the bluish place veins undulated
& follicles, are pustular, & now, cicatr. also
numerous, & rough, cheeks. Infilt. much
above mucocutaneous area before the mouth.
Gray ^{les} betw. acne rosacea L. vulgaris & erythema
for A. was the reddish col. & the vividness of
the veins & nose, & temples, & the circums-
tance, also the infilt. also may come in it
against it. Leucophaea & ammonia, found in
periphery, mucus, brain and Leucophaea & flesh
& bone, also a. was ^{and} found a few acne papules
or of all gone get ^{the} sebaceous & pus on pressure
done in a. w. the infilt. would only be an accident
complic of it as in inflam. processes of acne
the etiology, a drinker or sexual derangement
are also a factor. This not raised.

Lupus in them also ^{then} a butterfly appe. we also in
^{then} Leucophaea evident infilt. in this disease, but
